

SUPER MARIO MATCHER

The directions to the game are to match as many Super Mario characters in 30 seconds. The user can match characters in only a vertical or horizontal direction. The goal is to accumulate the highest score. The user can replay the game as many times as possible. The user can also exit the game or start a new game (which resets the timer and board). Each pair of matched characters the user finds count as 10 points. The user wants to accumulate the highest score possible. The game ends after 30 seconds.
